

Personal News Brief – 2026-10-04

Brief date: 2026-10-04 · Version: 1 · Status: published

Report and capture details

Report UUID: 76078893-1fd8-4386-b1d6-14c87995706c
Snapshot UUID: c2ec88f7-2b8e-4d96-bd79-28a0e05f20be
Run UUID: 9c3515f8-1d29-4fa9-9263-75dd4d8d63e5
Profile revision UUID: 9b876671-11ea-4ecc-ae32-c3902f21dd40
Capture started: 2026-10-05T00:16:36.345182+00:00
Capture ended: 2026-10-05T00:16:36.415531+00:00
Feeds configured: 1
Feeds attempted: 1
Feeds succeeded: 1
Feeds failed: 0
Feeds paused: 0
Articles captured: 1
Items fetched: 1
Pending items: 0
Pending capacity: 2000

Executive Summary

The configured feed reports that the agency approved the coastal resilience project. This brief records the approval as a source-reported assertion from the captured article. The retained excerpt attributes the statement to the agency and does not add a reason, budget, schedule, or predicted outcome. Coverage in this snapshot comes from one configured source, so the report does not treat repetition as corroboration. The item appears because it matched the personal source and phrase settings. No independent verification, risk estimate, historical comparison, or forecast is supplied. The available evidence supports only the reported approval and its attribution within this captured source record.

Agency approves coastal resilience project

The leading item in this personal snapshot is the reported approval of a coastal resilience project. The configured feed says the agency confirmed that approval, and the brief preserves that attribution. The source record does not state a budget, schedule, implementation milestone, motive, or expected effect, so this section adds none of those details. It also does not turn the source statement into an independently verified fact. Coverage is limited to the retained article from one selected feed. No second source in this run corroborates the assertion. The supported reading is therefore narrow: the captured publisher reports an agency confirmation that the project was approved, with no further conclusion about delivery or impact. The record offers no basis for additional interpretation.

What Changed Since Yesterday

No published brief exists for the previous day, so today's figures cannot be compared against what we previously reported.

No risk carried an observation on both sides of the window, so no day-over-day movement could be measured.

Data Quality

[capture_coverage] Capture completed for 1 of 1 configured feeds; 1 articles were retained, 0 feeds failed, and 0 feeds were paused at pending capacity.

[no_risk_observations] Personal Phase 2 does not compute or narrate risk scores.

[no_reliable_analogy] Historical analogy generation is disabled for the personal Phase 2 workflow.

[no_prior_brief] No prior personal brief is injected into this immutable snapshot.

[no_prior_comparison] No published brief exists for the previous day, so today's figures cannot be compared against what we previously reported. No risk carried an observation on both sides of the window, so no day-over-day movement could be measured.
